Hello, all.

I hope everyone is managing to enjoy the holiday season despite heavy workloads!

This report was released today, and we are digesting all of this information and wanted to send it to you all ASAP for reading. (We received it within the past hour.) In particular, we are learning about the uranium, thorium, lead and found in house dust samples from CWC floodplain homes.

As you all know from our extensive conversations, many homes flooded repeatedly with pre-FUSRAP remediation activity CWC floodwaters before (and many, but fewer homes, after) the MSD flood control project in Florissant and Hazelwood.

Please read this report and feel free to converse with us as soon as your schedules allow. We see this report has already been made available to the public!

Best regards,  
Jenell
